## Perennials for Dry Shade

**Note:** When creating a dry-shade garden you **still must water** your new plants until they are established. Plants are NOT drought tolerant until they have an extensive root system developed, which can take up to a ***full year or more.***

<u>Common Name</u>	<u>Botanical Name</u>	<u>Common Name</u>	<u>Botanical Name</u>
Bear's Breeches	<i>Acanthus mollis</i>	Yellow Archangel	<i>Lamium galeobdolon</i>
