Rabbit Resistant Perennials

These cute little furry critters can wreak havoc on your garden, nipping off freshly budded flowers or chewing down the lush new Hosta growth the moment you turn your head. Here is a short list of perennials that rabbits tend to leave alone. Please use this list as a “guideline” and not an absolute. Also, we encourage you to share your observations with us and let us know what does and does not work for you. Your personal experiences help us to formulate these helpful garden handouts.

<u>Botanical</u>	<u>Common</u>	<u>Botanical</u>	<u>Common</u>
<i>Achillea</i> spp.	Yarrow	<i>Helleborus</i> spp.	Lenten Rose
<i>Aconitum</i>	Monkshood	<i>Hemerocallis</i> spp.	Daylily
